

Water savings - Car washing

Industry & location: Bagga Link Motors Ltd, Patparganj, Delhi

Sector: Automobile service station

Before: The water hose was left open after use in the car washing section leading to fresh water loss

After: The industry trained the workers to close the valve of the water hose after car washing. This intervention led to reduction of water consumption and waste water generation. Savings in water consumption is estimated to be 15,000 litres per year.

Costs/benefits

Cost: Nil

Annual Savings: Rs.7,200/-

Payback: Immediate
